Customer Reviews

Jeff Wilson has written more than 25 books on railroads and model railroading. He spent 10 years as an associate editor at *Model Railroader* magazine, and he currently works as a freelance writer, editor, and photographer, contributing articles to MR and other magazines. He enjoys many facets of the hobby, especially building structures and detailing locomotives, as well as photographing both real and model railroads.

I'm getting to be a broken record here, but once again, and like his other books, I found this to be a fine and very useful introduction of the subject. He also had an up to date listing of manufacturers that is very helpful. For inexperienced and moderately experienced model railroaders you just can't go wrong with Jeff Wilson's books.

Great book

I have started a layout 30 years ago but could never complete it because of numerous relocations. Am now retired and want to refresh my skills. Great book to review how to make the best looking trackwork.

Good book for the beginner.

Another in a series of How to Books Presented by Model Railroader and Kalmbach!!!! Informative book if your beginning laying track needs more detail!!!!!!

On track.

Great!

This has been a well used resource for my new hobby. Product arrived on time and as advertised. Significant savings compared to other vendors.
