Addition 0 To 12 (Brighter Child Flash Cards)

Synopsis

Brighter Child's® Addition 0 to 12 Flash Cards offer children a fun and easy way to practice their addition skills. The set features 54 cards with two addition problems each, their answers on the opposite side. Bright, bold numbers are placed on a white background for easy reading, and a special card also offers creative game ideas designed to reinforce learning. The popular Brighter Child's® Flash Cards give children a fun and easy way to practice important skills. Offering 24 titles encompassing preschool to grade 5, each title focuses on an important subject including early concepts, math, phonics, and U.S. History. Fun game ideas and learning suggestions are included to help children build proficiency and confidence. Game cards also allow children to develop thinking, decision-making, turn-taking, and social skills while playing fun games at the same time. Select titles are also available in English-Spanish and Spanish-only versions.

Customer Reviews

I am not happy with these cards. Instead of the equation on one side and the answer on the back these have another math problem. The whole point was you read the problem and flip over to see answer. I'd have been better off buying index cards and making them. Waste of time.

Obviously, I don't know my multiplication tables. There are 54 cards in this deck. Each has an

equation on both sides. So the maximum number of equations is???????? 108. Without doing any math, I was expecting at least 144 equations, which would require 72 cards. Now really there should be 156 equations because there are cards with zero based equations. So there should be how many cards??????? 78.Nope. Only 54.So my plan of learning the 2s, then learning the 3s, then learning 4s, etc isn't going to work with this set of cards. :(

GREAT PUZZLE (read notes). My grandma, who is so precious to me, unfortunately has dementia and she was able to do this puzzle. I was initially concerned about the "quantity of pieces" but THANKFULLY she proved me wrong. In fact I logged on here to search the same seller's website to see if I could find similar puzzles, same size and dimension, same amount to pieces. She has done amazing with this one

I bought these so my 7 yo could practice math facts. There's an equation on both sides with the answers to each in the upper left corner of the opposite side of the card. She has adhd and was getting distracted by this so I had to cover the answer with my thumb so she could focus on the equation I was showing her. No biggie. I have her a penny for each one she got right in 5 second which she then traded in for nickels, dimes and quarters.

Excellent product. More sturdy than the standard cards.

very happy with item

the description is correct about the product 100% not waterproof but water resistant great to take with you for quick study not use permitted marker for it will not come off there are 2 math equations one on each side and the answer is on the top right hand corner

Does not include all addition numbers from 0 - 12. Not a complete set.
