ISBN-13: 978-0123852434

Product Dimensions: 7.7 x 1.3 x 9.3 inches

Shipping Weight: 3.4 pounds (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 stars 109 customer reviews

Best Sellers Rank: #61,733 in Books (See Top 100 in Books) #18 in [Books > Law > Criminal Law > Evidence](#) #30 in [Books > Health, Fitness & Dieting > Psychology & Counseling > Forensic Psychology](#) #30 in [Books > Medical Books > Psychology > Forensic Psychology](#)

## Customer Reviews

Now in its fourth edition, *Criminal Profiling* is an established text centered on the deductive profiling method developed by the author. Deductive profiling is different from other forms of profiling in that it does not involve averaged, statistical profiles. Instead it focuses on criminal profiling as an investigative process, solving real crime through an honest understanding of the nature and behavior of criminals. It approaches each criminal incident as its own universe of behaviors and relationships. Throughout the text, the author illustrates the most crucial tenet that any good criminal profiler should adhere to: the enthusiastic desire to investigate and examine the facts. *Criminal Profiling* is an ideal companion for students and professionals alike, including investigators, forensic scientists, criminologists, mental health professionals, and attorneys. Readers will use it as a comprehensive reference text, a handbook for evaluating physical evidence, a tool to bring new perspectives to cold cases, and as an aid in preparing for criminal trials.

**New Features** New cases in every chapter New chapters in logic and reasoning New chapter reviewing non-evidence based profiling methods New chapter on mass homicide New chapter on terrorist profiling and interviewing

**Additional Features** Best-selling author Brent Turvey defines the deductive profiling method, which focuses on examining the nature and behavior of criminals in order to solve crimes. Contributing authors represent law enforcement, academic, mental health, and forensic science communities for a balanced perspective. Completely revised with 35% new material including updates on the latest

advances in evidence-based profiling. Excerpts from Criminal Profiling Case Example:

**Blackmail** In an extortion case, the offender sent a message to the victim from a Web-based e-mail account. The Internet protocol (IP) address contained in the e-mail header showed that the message was sent from a computer located in an Internet café, but investigators were unable to determine who was using the computer at the time. Believing that the offender may have checked the Web-based e-mail account for responses to his message, investigators obtained all records relating to that account from the Internet service provider. These records indicated that the offender had indeed connected to the e-mail account from his home computer. Read the rest of the chapter "Cyberpatterns: Criminal Behavior on the Internet" [PDF] from Criminal Profiling.

Praise for the third edition: "In the third edition of this very popular textbook, Brent Turvey clearly demonstrates that criminal profiling has established itself as a scientific endeavor rather than an exercise in investigative intuition. This textbook pulls together an impressive amount of substantive knowledge from a variety of disciplines in order to provide the reader with a foundation upon which to develop a mastery of the criminal profiling process. As Turvey demonstrates throughout the text, however, there are various methodological approaches to the practice of criminal profiling.

Paramount among these, he argues, is the method known as Behavioral Evidence Analysis, which is described and illustrated in great detail throughout this remarkable book." --Daniel B. Kennedy,

PhD, Forensic Criminologist, University of Detroit Mercy "The third edition of Criminal Profiling is sterling!" --Stan Crowder, Ph.D., Assistant Professor of Criminal Justice, Kennesaw State

University, GA Praise for the previous editions: "This text documents the principles of proper criminal profiling and undertakes to establish definite criteria for professionalization...should be reviewed by anyone intent on becoming a professional criminal profiler." --AMERICAN

JOURNAL OF PSYCHIATRY "...a thorough grounding in what is a relatively new field. This is more than a basic text and...should be required reading for all criminal investigators." --CRIME AND JUSTICE INTERNATIONAL "...an important contribution to the systematic study of the

behavioural evidence linked to the perpetration of serious crimes...Brent Turvey's opus is a major and much needed step toward professionalism [of criminal profiling]." --THE EXPERT

"Decrying faith-based thinking, amongst some who call themselves criminal profilers, this work seeks to professionalize criminal profiling by insisting that it rest on a proper background in the behavioral sciences and criminal forensics; hence the secondary label found in the subtitle, "behavioral evidence analysis." The author (together with collaborators) describes the skills, techniques, and methods of this scientifically-oriented criminal profiling in 25 chapters

organized into sections on introductory issues, forensic victimology, crime scene analysis, offender characteristics, and professional issues (i.e., ethics and trial testimony)."--4th Edition review in Reference and Research Book News

Where to start in understanding criminal behavior in order to catch them.

Examining Criminal Profiling - Studying this - pretty self explanatory.

I bought this book to assist my sister and I in writing our first novel, a murder mystery. It has been a most helpful research item.

I am a student in Forensic Psychology and Criminal Justice. Love this book, It is real and holds nothing back. The photos are of real crime scenes and may not be for you if you are sensitive to gore.

Came in exactly as stated.

Book is great! Service was even better!!!!

Wonderfully informative

Awesome
