Customer Reviews

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

This is an excellent design book. You can use standard size printer paper for the designs (or use bond resume paper). I purchased years ago for my son and we had years of fun flying planes through the house and outdoors. I purchased again this year for my great nephew.

"Planes, Jets & Helicopters" is lots of fun and doesn't require anything more than the typical 8.5 x 11 sheet of paper. Gives good instructions on how to build AND how to throw the planes. This book makes a great way to have fun with the kids. Our [...] sons love this book. The planes vary from the simple spinning dart to a few slick jets. We first discovered this book at the library. With all the kid abuse toward the book we finally had to buy our own copy. I was also surprised at how much fun my inner engineer/crafty-person was having. My only complaint would be that we found a couple of instances in the book where the instructions referred to "point A" and there was no "point A" to be

found. But with the figures/pictures it was easy enough to figure out. Overall... a lot of fun for the family and the engineer/child/crafty-person in you.

Too many of today's paper airplane how-to books are unnecessarily expensive and the planes require elaborate preprinted one-of-a-kind paper. This little gem is affordable, and the planes can be constructed from standard 8 1/2" x 11" sheets of paper. It's a great investment--fun for today and for tomorrow.

I've always loved making paper airplanes, and this book has plenty to choose from. Directions are mostly easy, though some are challenging. I taught a craft youth session making and flying these, from ages 6-12 and it was a hit. Even taught a little about aeronautics.

The product arrive as advertised. It was in good condition. It was a GIFT to a young kid and she LOVED IT. I would consider buying from the seller again.....!

still too complicated, but enjoyed some of them

Excellent!!
