HARVONI: Treats Chronic Hepatitis C (Viral Infection That Damages The Liver)

Synopsis

“Although, your health condition may impact your everyday life, do not let it define who you are.” HARVONI (a combination of ledipasvir and sofosbuvir) is used to treat chronic hepatitis C (an ongoing viral infection that damages the liver). Sofosbuvir is in a class of antiviral medications called nucleotide polymerase inhibitors. It works by decreasing the amount of hepatitis C virus (HCV) in the body. Ledipasvir is in a class of antiviral medications called HCV NS5A inhibitors. It works by stopping the virus that causes hepatitis C from spreading inside the body. It is not known if ledipasvir and sofosbuvir prevent the spread of hepatitis C to other people. This medicine is available only with your doctor’s prescription. Thanks and may you have a good understanding about this drug HARVONI. You may want to share this book with your family and friends who may be in need of help and would want to use this medicine. Take care, and as always, be well!

Customer Reviews

Book is for doctors not common people without medical training.

This book is not an easy read for the normal person.
