If you are looking for a detailed map of London---this was disappointing. It doesn't show all of London --it does have a nice tube map on it--but that covers part of the city. We were able to place most of the places we wanted to visit but it wasn't quite what we wanted. We will have to get something better later on to help us with walking the city & negotiating streets. Also appears to be somewhat off on distances compared to when we put in addresses on google maps & their key of distances.

very clear map of central London, big enough to provide significant detail, but not so large it becomes difficult. The major attractions are already marked and I'm marking everything else I want to see. This will make it much more time-efficient to route my day and not accidentally bypass anything and have to back track!

I was very pleased with this map of London. it was easy to carry, easy to open and easy to read. But I was disappointed in it because the flat where I ws staying was on the South Bank and the map didn't show the area I was in at all. Yet on the north side of the Thames, the map ranged well out of London into the suburbs.

Just what I needed-Thanks!

Great map

Very easy to read. Shows the major attractions. Has a tube map on it. I have not gone on my trip yet but I know for sure I will use this a lot.

It's great in that it has the major sites identified with easy to read icons -- helpful to get oriented & plan. The finish makes it durable but hard to mark and write on.

Very clear detail but only shows half the city.
