Dinosaur Facts For Kids: Children's Dinosaur Books

Synopsis

A child would enjoy a Dinosaur Facts for Kids Picture Book because children naturally want to obtain knowledge and enjoy learning. Dinosaurs are very interesting to children and children often like to learn new things about them. Seeing the photos in the book will stimulate the child visually while they can also listen to someone read the dinosaur facts to them or read the facts themselves. There are so many different types of dinosaurs that children will be very attentive while reading a Dinosaur Facts for Kids Picture Book. Kids of all ages would enjoy a Dinosaur Facts for Kids Picture Book!

Customer Reviews

This book of dinosaur facts and pictures will inform and entertain young learners interested in the large lizards of old. One thing keeps this from being a 5 star ebook. On page 28 there is an incomplete sentence "Scientists measure smartness by figuring out how big an animal compared to it's body." I'm sure the sentence should be "Scientists measure smartness by figuring out how big an animal's brain is or was compared to it's body." The pictures are computer generated, but that is to be expected. Of course, the only actual pictures of dinosaurs is of their skeletons, but there are

none of those in this book. The textures used on the computer models, which are in this book, are a little over sharpened, but as a whole, they do capture what we think most dinosaurs looked like. They will assuredly stand out to young readers. Overall, this is a nice, easy book for kids to enjoy while broadening their understanding of extinct species. Disclaimer: I received this product in exchange for my honest review.

My 3 year old LOVES dinosaurs. We have lot of dinosaur books with facts but they are too advanced for his understanding and the pictures are unappealing for a 3 year old. Not this book! I read this to him last night before bed. This is the first e-book I have introduced him to and he loved it. This book has great facts and photos. I learned a lot of cool facts along with him. It is 52 pages of everything a little 3 year old could want to know about dinosaurs. What I also like about it is that my 9 year old could easily read this to him as well. It is fun for kids of all ages, as we are all interested in dinosaurs. I highly recommend this book to any parent. I received this e-book for free in exchange for my honest opinion in this review.

I loved dinosaurs as a child and my nephew is at the age where he is becoming quite interested in them, so I thought this book would be great based on its title. First the good: 1) The photos are quite nice to look at. 2) There are some interesting facts included. I actually learned a few new things myself. Or, maybe, re-learned a few things... The bad: 1) It seemed incomplete. I know there is a lot to be said about dinosaurs, but I feel this book just doesn't have a very good flow to it. The last page, in fact, seemed to end so abruptly I thought perhaps it didn't download completely. 2) It would have been nice if the pictures of the dinosaurs included the name of said dinosaur. I understand this is a book for children, but it is almost as if a child wrote it. :(If you want something with a few facts and some cool pictures, I'd recommend it. But as far as a great dinosaur book for learning, this is not. I'll have to dig up the one I owned growing up to pass on to the nephew. **This book was free in exchange for an unbiased review. **

This book was pretty interesting to look at. My 2 year old daughter loves dinosaurs so I got this book for her on her tablet. She is obviously interested in the pictures more than the facts but I read them to her. The only thing I didn't like was that the pictures of the dinosaurs didn't have the type listed on the pictures. That would've been helpful because my daughter kept asking what kind they were and I didn't know all of them. It is fun and educational regardless, I was fortunate enough to get this book in return for my unbiased review. Let me know if my review was helpful.

I got the Kindle version of this book and was a bit disappointed. While there are a ton of pictures, none of the pictures have any text to indicate what dinosaur we are looking at. There is no reference page at the end that says what they are and so there are just a bunch of black and white pictures (in the print version they are in color, as well as if you use the phone Kindle app) of dinosaurs that my daughter kept asking "what is that one", leading me to have to sit at my computer to go through the book with her and constantly search and hunt to find out what type of dinosaur it was. I went ahead and loaded the Kindle app on my phone so we could at least look at the pictures in color. At least on the app version, in color, you can see the nicely computer-rendered dinosaurs in full color. Some you could figure out based on the text page before or after, but not all. This was horribly frustrating and a big fault in the book, especially since there were more pictures than facts throughout. The facts themselves were good and we found them interesting. Since my daughter LOVES dinosaurs she ate up all the information she could from this little book. Based on other reviews, it seems the way to go with this book is the print version. If you are going to get the Kindle version, pull it up on a color screen, on a normal Kindle, it leaves A LOT to be desired and isn't worth your time. Note: I received this book at a discount in exchange for my honest review.

We purchased this ebook for free, and it was definitely a hit with my 4 year old son. He sat through the whole thing, and liked both the pictures and the facts. While this book was intriguing for my son, there are things that I think could use improvement. The biggest improvement I think would be to show the dinosaurs name on the computer generated pictures! It seems sometimes there is a correlation between the images and the text, but not all the time. It would be easy to label the dinosaurs and clear up any confusion. As another reviewer also pointed out, on page 28 there is an incomplete sentence "Scientists measure smartness by figuring out how big an animal compared to it's body." I'm sure the sentence should be "Scientists measure smartness by figuring out how big an animal's brain is or was compared to it's body." The other thing that struck me as odd was the contrast of cartoon dinosaur backgrounds on the facts page vs the realistic computer generated pictures on the other pages. All in all, did it capture my child's attention and do I think it contained some neat information about dinosaurs? Yes. But it could be done better.
