The Science Teacher's Activity-A-Day, Grades 5-10: Over 180 Reproducible Pages Of Quick, Fun Projects That Illustrate Basic Concepts

Synopsis

A hands-on and fun-filled resource for teaching science to middle and high school students New in the 5-Minute Fundamentals Series, The Science Teacher's Activity-A-Day, Grades 6-12, includes 180 easy, five-minute hook or sponge activities to capture learners' attention and introduce lessons. Divided into three units, Physical Science, Life Science, and Earth and Space Science; the activities cover topics based on the National Science Education Standards. All the book's activities can be done with materials that are inexpensive and easy to find Includes quick and fun "sponge" activities that are designed to engage students All the activities take about 5 minutes to complete The Science Teacher's Activity-a-Day is an ideal resource for middle and high school science teachers.

Customer Reviews

"Each activity begins with a concise explanation of the concept upon which it focuses and includes a materials list, the procedure, follow-up questions, and extensions. These high-interest investigations use materials that are inexpensive, easily accessible, and familiar to students" (National Science Teacher's Association.org, October 2010)

The Science Teacher's Activity-a-Day Grades 5-10 The newest volume in the 5-Minute FUNdamentals Series, The Science Teacher's Activity-a-Day is a fun-filled resource for teaching hands-on science to middle and high school students. With over 180 five-minute hook or sponge activities, teachers will find it easy to capture students' imaginations and introduce

compelling science lessons. Inside this book, you will discover: Over 180 easy, five-minute sponge activities geared to various levels Activities incorporating all major science topics—life science, physical science, and earth and space science Projects that can all be accomplished with inexpensive and easy-to-find materials, such as string, clay, scissors, chalk, and plastic bottles Activities that are clearly correlated to national science education standards These quick warm-up lessons can help students link familiar concepts to a new topic, or reveal gaps in knowledge, making it easy to set learning goals. With these engaging, exciting lessons, The Science Teacher's Activity-a-Day can help every science teacher get his or her class off to a dynamic start. Praise for The Science Teacher's Activity-a-Day "Research shows that students are more attentive at the start of a lesson. The Science Teacher's Activity-a-Day provides short and engaging activities to get your lesson off to a dynamic start." —RYAN ADAMS, Ed.S., Douglas County Teacher of the Year, Douglas County School System "As a differentiation facilitator, I know how difficult it is for teachers to engage students of various learning styles and intelligences. I recommend this book to science teachers in middle through high school to kick-start science lessons." —LYNN FREEMAN, School Improvement Specialist, Metropolitan Regional Educational Service Agency, Atlanta

Kids love picking out experiments to do several days a week. We have been going through the book in a random fashion. Not worrying about going in the order of the book. Takes hardly any time at all to set up the experiments and we have yet to find an experiment where we did not already have the supplies needed. I am sure that there are a few that we will need to buy supplies for, but I'm not worried about having trouble finding them. There have been a couple that haven't quite worked as described, but I am not ashamed to say, it may be due to user error than anything else, to be honest.

I used this with the Teaching Science With Interactive Notebooks. The two together are fantastic for mixing Reading, Science and Language arts together. My students loved doing the experiments and eventually grew to love the journal as well.

Absolutely is a must for new teachers! The activities are spot-on with materials that are classroom and budget friendly. I used every activity in the evolution section and my students were thrilled with a class period of activity stations.

This little activities are perfect to start a concept or summarize it. Well done!

Love it! The things to do are quick and cheap and easy, but gets the lesson point across.

There are some great ideas in here. Unfortunately my 5th grade science students can't use most of these. In fact, they can only use a couple. Too bad it's recommended for 5th through 10th.

Great Resource!

=)
