## Customer Reviews

"Seldom, if ever, within the scientific tradition, has the excitement of the universe been expressed in such memorable phrasing." (Thomas Berry, Creation magazine)

Brian Swimme, Ph.D., a specialist in mathematical cosmology, was educated at Santa Clara University and the University of Oregon. At the present time, he is the director of the Center for the Story of the Universe, a research affiliate of the California Institute of Integral Studies, in San Francisco.

An absolutely impassioned way of looking at the way the world and the universe works. It really makes you look at things different. You are connected and every inspired or lustful thought, and every point of fascination is proof of that. We all have an important role to play in this world. I appreciated that message more than any other. I tell you what, I'll never look at my janitor or my accountant the same again.

This is my daily meditation book. I have read and re-read it and find it my best connection to the creator even though there is not one mention of God or religion.

I liked this book which has some concepts I had not heard or considered before re: the creation of the Universe and explanations of gravity, etc. I've read a lot of quantum physics but this little book gave me a lot to think about. In fact, for the new ideas it presents, it could have been longer. When you pack a lot into a small space, it can be hard to digest. Still a great little book for those who like to really think outside the box.

This book is my new bible it is full of TRUTH. took two readings to get my mind out of the way to understand what the inspired author was saying. What about that!

Still one of my all-time favorite books. it has the feel of a children's book and is very easy to read, but it is very intelligent, inspiring and thought-provoking despite it's simplicity. Still to this day the only book (and I read a lot!) I have read more than once - at least 10 times and also the only one I always keep extra copies around so I can give one away.

I love Brian Swimme and his easy to understand story of the universe and why we should continue to be in awe! Just think, every time I gaze at the moon or walk through the forest, I am exchanging energy with them!

This book is wonderful. I love the chapters explaining love and attraction. I read it all the way through in about two days.

Really interesting book. His description of the cosmos and the miracle of everything was awesome. Brought to light the laws that govern everything; many parts of the book are fascinating. I may read it again.
