But what exactly do those sayings mean??? Without something concrete, it's difficult for players to understand what it specifically takes to have a mental approach primed for success. And rather than have a debate with someone who knows nothing about mental training or sports psychology... or read about theories and mental hacks that may or may not work off some random website...why not use a detailed, interactive, and engaging workbook that shows and teaches athletes how specific Sports Psychology concepts directly impact their performance on the cricket field?
