101 Rules Of Thumb For Low Energy Architecture

Synopsis

101 Rules of Thumb sets out the essential elements of low energy architecture in a fresh, intuitive way. In an area where ever-changing technology and complex legislation can cloud the designer's thought-processes, this book encourages the designer to think clearly and intuitively about the fundamentals of low energy buildings. With reliable, simple rules of thumb that will provide new ideas and refresh the designer's palette, each page focuses on a single piece of advice or guidance along with a clear hand-drawn illustration, while there are also plenty of tips and more detailed information for those who wish to dig deeper. The emphasis is on passive low-energy principles, and the rules of thumb cover all the design fundamentals from site and location to orientation and form, peppered with some which will help the designer to think outside the box about the design process itself. Applicable throughout the world in any climate region, 101 Rules of Thumb is a global primer intended to be dipped into at any time as a quick means of re-focusing on what's important when designing a new or retro-fitted low energy building.

Book Information

Paperback: 128 pages

Publisher: RIBA Publishing; 1 edition (October 21, 2013)

Language: English

ISBN-10: 1859464815

ISBN-13: 978-1859464816

Product Dimensions: 7.3 x 4.8 x 0.6 inches

Shipping Weight: 12.6 ounces (View shipping rates and policies)

Customer Reviews

Huw Heywood is an architect with over 20 years experience in practice internationally. He is Principal Lecturer at Portsmouth School of Architecture in the UK, and maintains a particular focus on teaching and research in environmental and sustainable design, which he teaches at both undergraduate and postgraduate levels.

Easy to read, very practical and full of comprehensive and beautifully drawn diagrams to use in your projects.
