Advertising And Promotion: An Integrated Marketing Communications Perspective, 10th Edition (Irwin Marketing)

Synopsis

In this 10th edition, Belch/Belch introduces students to the fast-changing field of advertising and promotion. While advertising is its primary focus, it is more than just an introductory advertising text because there is more to most organisations' promotional programs than just advertising. The changes happening in the world of advertising are leading marketers and their agencies to approach advertising and promotion from an integrated marketing communications (IMC) perspective, which calls for a 'big picture' approach to planning marketing and promotion programs and coordinating the various communication functions. To understand the role of advertising and promotion in today's business world, one must recognise how a firm can use all the promotional tools to communicate with its customers. This 10th edition, with its integrated marketing communications perspective (the theme of the text), catapults the reader into the business practices of the 21st century.

Book Information

Series: Irwin Marketing

Customer Reviews

Professor and chairman of the Marketing department at San Diego State University. He received a B.S. in Marketing from Penn State University, an M.S. in Marketing from the University of Colorado and a Ph.D. in Marketing from the University of California, Los Angeles. He has published numerous articles in prominent journals Professor of Marketing at San Diego State University. He received his B.S. degree in Marketing from Penn State University, his M.B.A. from Drexel University, and his Ph.D. in Consumer Behavior from the University of Pittsburgh. He has published articles on advertising and marketing in a variety of journals and serves on the editorial board of the Journal of

Advertising. He also consults for a number of companies in the areas of advertising, marketing strategy, and marketing research.

Some text books are great reads. They are filled with information about the topic, include relevant examples, and explain things concisely. This book is not one of them. The information is buried in tons of redundant examples and verbose descriptions. There are also long winded real life stories that would add to the topic if the reader was not already bogged down in the overwhelming text. I never knew what a poorly written text book looked like until this semester. I saved this class for my senior year because it was the class that I most looked forward to. Having to read this book is ruining the class and taking time that could be better used studying for other classes or doing other valuable activities.

My seller was awesome; shipped promptly and the book is in great condition. No comment about the book itself, I just got it today. My rating is because of the listing itself - whatever idiot created the listing said it has 1760 pages for the hardcover, and 842 for the softcover, "global" edition. Well, the hardcover also has 842 pages, not 1760 as described in the listing. I wouldn't be so pissed about it, except that I was expecting a 1760 page book, had a problem with a previous seller where this was ONE of the points of contention. SOMEBODY needs to correct the stupid listing.

Typical marketing text books full of interesting cases and examples. The writing is at times a bit boring and sterile, and I don't like that definitions of important concepts are not highlighted enough, let alone reiterated in the margins, as it is done in many other such texts. Chapters tend to be a bit long, but it is a fine text book. I'm reading it as an MBA student, and must say this book is very much geared towards undergrads about to start their first job (this is obviously not the author's fault, but in case a professor reads this, this might be worth noting).

0 STARS IF I COULD! As the other one-star review mentioned, this book is total crap. It is full of useless examples. Every other sentence you read, there's a damn example. The authors seem to LOVE adding in useless sentences. In Chapter 10 (TV and Radio), the poorly written book states, "Zapping refers to changing channels.....Nearly all [TVs] come with remote controls, which enable viewers to switch channels" (p381). Oh really? I have never heard of a damn remote nor have I never seen more than one TV in my life! This book angers me so much. Once I read that sentence I just had to write a review on this crap book. This is the worst textbook I have ever read. Whoever

edited this book should be fired (dont get me started on the authors). The book would be half it's size if a competent author wrote it. Don't waste your time and money on this book. Professors, I beg of you DO NOT have this as your textbook.

I rented the version for kindle a week ago, and received the confirmation email. The book shows up under the digital orders section of "manage devices" and yet every time I try to "deliver" it to my Kindle for Mac it fails to show up in my library... even after waiting for quite some time. It seems to be a technical problem on 's side. However, I have had a very hard time finding a way to voice this problem to and thus decided to write a review in hopes that something can be resolved.

I had to use this book for one of my business classes. One of the more easy reading textbooks I have ever read.

The worst marketing textbook ever. It was required by my professor but I could have simplified all 91923982389198732918723 pages into probably 10 paragraphs. Outdated, inefficient, compltely unnecessary and super boring. And this is coming from someone who is sick because I generally enjoy reading dry textbooks. Avoid this book if you can!

Seemed a little outdated to me for a text that teaches on marketing. An industry that you want to be a head of not behind in.
