Best Sellers Rank: #8,864,655 in Books (See Top 100 in Books) #83 in [Books > Children's Books > Education & Reference > Science Studies > Engineering](#) #1072 in [Books > Children's Books > Science, Nature & How It Works > Inventions & Inventors](#) #168474 in [Books > Children's Books > Literature & Fiction](#)

Age Range: 9 and up

Grade Level: 4 and up

Customer Reviews

Gr 4-6--Interesting and attractive explanations of how video, satellites, and television function, and how these inventions have influenced the information explosion. A brief history of each invention, a description of its many and varied uses today, and predictions for the future are included. Of special note are the number of full-page biographies of individuals who were pioneers in their respective fields, information not easily found elsewhere. The many full-color photographs greatly enhance the texts. Readers gain a clear insight into the impact these inventions have had on society. "Amazing facts" sidebars offer additional tidbits of data, and the glossary, timelines, suggestions for further reading, and index all make these titles especially useful. Good choices for libraries needing current books on these topics. Marion F. Gallivan, Gannon University, Erie, PA Copyright 1998 Cahners Business Information, Inc.
