The New Simple And Practical Solar Component Guide

Synopsis

Have you ever wanted to save money on electricity and become energy-independent? Do you want to protect your family from regular power outages and negligence of local utility? The book "The New Simple and Practical Solar Component Guide" helps you accomplish this by understanding the essentials of building blocks of solar and harnessing solar power. Written by electronic engineers this easy-to-read-and-follow solar components guide demystifies all of the components of a solar power system in a way that anyone without a technical background can understand. The book is useful for a broad audience: technically and non-technically inclined people, beginners and advanced in solar power, and professionals of engineering background. Based on thousand hours of research and experience, the book contains practical solar power information you cannot find and cannot apply by just searching the web. This book will save you a lot of money and trouble for years to come! This book shades lights on:

- electricity basics related to solar power
- solar power system types
- solar power system components:
- solar panel module types
- bypass diodes
- blocking diodes
- inverters
- microinverters
- charge controllers
- batteries
- fuses
- surge protectors/arrestors
- disconnects (circuit breakers)
- junction (combiner) boxes
- cables ... and more.

Furthermore, this guide provides you with a serious introduction and practical information to solar power coupled with action-oriented how-to tips and guidelines about selecting, combining and sizing solar components as well. Every journey starts with most important first steps and having a solid foundation about solar components is a prerequisite for getting an efficient safe and cost effective solar power system for your home, RV vehicle, boat or business. Without this essential knowledge, every attempt for designing and sizing a solar power system will be either fruitless or counterproductive. Grab the Book Today and Get Started Saving Money on Electricity and Becoming Energy Independent. Act Now!

Customer Reviews

Lacho Pop, MSE, has more than 15 years of experience in market research, technological research and design and implementation of various sophisticated electronic and telecommunication systems. His large experience helps him present the complex world of solar energy and solar power in a manner that is both practical and easy understood by a broad audience. Dimi Avram, MSE, has more than 10 years of experience in engineering of electrical and electronic equipment. He has specialized in testing electronic equipment and performing a techno-economic evaluation of various kinds of electric systems. His excellent presentation skills help him explain even the most complicated stuff to anybody interested.

very use full

Very informative.

Good research material.
