Construction Sites (Magnetology)

Synopsis

Awesome, Amazing—and Magnetic! Take a look at any busy playroom—it's a construction site! From their first blocks to when they pick up a toy car and go "Vroom-vroom!", kids are drawn to vehicles and putting things together. That irresistible combination is featured in this over-sized, so-much-to-do entry in the MAGNETOLOGY series. Flaps, gatefolds, and 45 magnetized workers, machines, and tools offer everything kids need to help construct a road, a house, a town. It's a proven way to encourage playful, hands-on exploration, sharpen observation skills, and build...bright minds!

Age Range: 3 - 5 years

Grade Level: Preschool - Kindergarten

Customer Reviews

Part of the Magnetology series, this oversize board book includes 45 construction-themed magnets—pipes, doors, signs, and loads of vehicles—that can be stuck and re-stuck onto the pages. (A helpful closing spread identifies the vehicles and their capabilities.) The book's four scenes revolve around the building a home, expanding a road, and supplying a neighborhood with water and electricity; Latyk's crisp digital artwork leaves plenty of open space for children to fill with jackhammers, cranes, excavators, and their operators. A mix of questions ("How do you think electricity gets into your house?") and construction details add some substance to the magnet-driven fun, while letting readers consider which tools are right for each job. Ages 3-5. (Apr.)

Marie Fordacq is a co-founder Editions Tourbillon – the Parisian parent of Twirl – and the author of several popular children's books, including Twirl's Play and Color in Black and White. She and her family live outside Paris, France. Olivier Latyk is part of "Brand New", a European artists' collective, and the illustrator of over 40 children's books. He also creates puzzles, toys, mobiles and enjoys fishing near his home in La Rochelle, France.

Regretted buying this as soon as I saw it. Pages were cheaply made and warped (wavy) so the magnets didn't stick well. Even on pages that were not as warped, the magnets were so weak that they didn't stick well when we turned the page. Magnets themselves were also cheap and bent. Kids played with it for about 30 seconds before giving up.

This product and the corresponding books are awesome! Our son just LOVES them!

Cute book

My daughter loves this and has been playing with it for days since we got this. This was a gift (not through) so I can't vouch for the seller. There are lots of truck magnets. They stick pretty well (better on the fridge than the book). Construction workers appear to be male and female and of different ethnicities. At the back is a description of each construction vehicle and what it's used for.
