Advanced Oncology Nursing Certification Review And Resource Manual

Synopsis

Both a study guide and a clinical resource, this new manual offers oncology advanced practice nurses a comprehensive review in preparation for advanced oncology certification tests and a valuable reference guide that can be used in everyday practice. This new manual addresses topics important to advanced oncology nursing and includes case studies and practice test questions nurses can use to help them prepare for advanced oncology nursing certification exams. Topics in this manual are representative of testing blueprints for the advanced oncology nursing certification tests so readers can feel confident that they are studying pertinent material. Yet, this new resource offers readers more than just a study guide for test preparation. Using the most current clinical evidence and literature available at the time of publication, the topics presented have been expanded and represent a valuable resource for oncology advanced practice nurses, graduate nursing students, oncology nurses in clinical practice, and other healthcare professionals.

Barbara Holmes Gobel is an oncology clinical nurse specialist at Northwestern Memorial Hospital and also serves as adjunct faculty at Rush University College of Nursing in Chicago, IL. I found there was a lot of content on the exam that was not in this book. I studied this book along with chemotherapy and biotherapies and did well on the exam but I feel if this book matched the exam more closely the exam would have been much easier. I would purchase it again but would not recommend using it as your only guide.

I am new to the oncology world this book was recommended by a certified oncology in NP. It has been invaluable to my practice and I find myself using it daily.

OK but somewhat of an outline without the details that I was hoping for.
