Brushwood is fun to watch on video too. Cohesive common sense information but of course the tools and materials used are a little bit dated. The Houdini excerpt is awesome. I have nearly 20 years experience as a breather/performer and still found this book valuable because the concepts do not change. Know your fuels know your mediums, know your surroundings, get to know your pain and discomfort tolerance levels and safety safety safety always. For newbies: Eating breathing and fleshing fire is uncomfortable at best and it tastes terrible and you are guaranteed to get diarrhea and fuel burps. You are always at risk of chemical pneumonia from aspirating fuel into your lungs, or getting badly burned or not killed. Get this book but in the name of all things common sense do not do any of this without the supervision of an experienced fire performer and safety crew. Your crew can be one person other than yourself but always have a safety/spotter. ALWAYS. Do not do this without an experienced person with you. We know things you do not...very necessary things you need to know about fuel and mediums, timing, tricks, etc. Even I, having performed for nearly 20 years, do not do fire practice by myself. I like my face and house too much to burn them.

I bought this book after watching Brian Brushwood's youtube videos about fire eating. I was definitely impressed with this book, since it perfectly expanded those youtube videos putting a huge emphasis on safety. I have since learned how to eat fire properly, and can do plenty of very impressive fire tricks using this book as an instruction. I highly suggest that if you are wanting to try this, you read this book, AND watch his "Scam School" youtube videos about fire eating, since only a video with his instruction can truly show you the movements you need to make to properly eat fire.

Very informative, covers everything you need to know before trying this skill, lots of quality safety information, good variety of tricks and some interesting history. Highly recommended for anyone interested in the art of fire eating.

By far this is the best fire eating book out there. It goes over and explains different types of fires and what extinguishers you need to use, safety tips, health warnings, how to make torches, shows and

explains many fire eating tricks with illustrations and tips, and much more. This book goes over every aspect of fire eating. I am very impressed.

Awsome book. Breaks down everthing you need to know about how to eat fire, build a torch, and do awesome tricks. Written like a text book with illustrations. Within one week of receiving book I was eating fire.

This is a spectacular book. The price tag held me off on purchasing it for a few weeks while I tried to justify the 40 bucks or so on a book for a hobby, but once I received it, it was obvious why it's not the average paperback price, this thing is a text book. Not only is it about the size of my human anthropology book from college, but it's actually written in a readable way. If you are looking for a solid book on the topic, I have searched and this is really your only option; fortunately, it's a great option and worth every penny. Couldn't recommend it more highly.

Great book. If you don't want to burn off your face and actually learn a fun skill this is the book for you. The history, science, and all kinds of fun facts in this book. If you want to try fire eating and don't get this book, I'm looking forward to seeing you on the news.

Brian not only gives you the down & dirty - he tells you his horror stories....if you want to perform this crazy stunt and are a chicken head eating geek like myself....it's a great place to start....warmest wishes to all !
