# Vintage Radios (Crowood Collectors' Series)

## **Synopsis**

Since the 1920s, the radio set has been an important part of most people's lives. In the thirties and forties, the wireless was an important piece of furniture and a potent symbol of status; beautifully made floor-standing and table-top sets in veneered wood and trendy bakelite became the focal points of living rooms up and down the land. After the war, the emphasis began to change towards portability, and the change from valves to transistors in the 1960s changed the radio into a more useful, but far less interesting object.

## **Customer Reviews**

Tony Thompson is a former teacher who has been interested in radios all his life. He collects, repairs and services vintage sets, many hundreds of which have passed through his hands. He runs his own vintage radio website and is the author of two books on the subject. Resident: Peterborough

nice book for foreign radios from the '30s through 50s

This book was mostly about radios made in England and Europe, I was looking for one in the line of the Collector's Guide to Antique Radios by John Slusser. I have looked for this book ,the seventh edition, but have found it si no longer in print and used or available editions are priced higher than it sold for originally a couple of years ago at about \$35.00.
