# Adams And Victor's Principles Of Neurology 10th Edition

## Synopsis

The gold-standard text that has defined neurology — and updated for today's practice in full color— Doody's Core Title for 2017! The definitive text on the full-spectrum of neurology for decades, Adams and Victor's provides the treatment and management strategies needed to confidently handle both common and rare neurologic conditions. Written in a clear, consistent tone, this classic resource will meet the needs of the seasoned professional or the aspiring clinician. Written from the perspective of the general neurologist, Adams and Victor's has been hailed as the most detailed, thorough, and authoritative text available on the subject. Adams and Victor's Principles of Neurology, Tenth Edition describes the various categories of neurologic disease and the main diseases that constitute each. Each subject is introduced by a detailed discussion of the symptoms and signs of disordered nervous function, their anatomic and physiologic bases, and their clinical implications. Adams and Victor's Principles of Neurology is logically divided into six parts: The Clinical Method of Neurology, Cardinal Manifestations of Neurologic Disease, Growth and Development of the Nervous System in the Neurology of Aging, Major Categories of Neurologic Disease, Diseases of the Spinal Cord, Peripheral Nerve, and Muscle, and Psychiatric Disorders. The Tenth Edition is highlighted by the welcome addition of full-color photographs, expanded coverage of important subspecialties, and an increased number of tables and figures. Edition after edition, Adams and Victor's has stayed true to its original mission: to provide a well-written, readable text emphasizing a disciplined presentation of clinical data and lucid descriptions of underlying disease processes.

Best Sellers Rank: #241,629 in Books (See Top 100 in Books) #176 in Books > Medical Books > Medicine > Internal Medicine > Physical Medicine & Rehabilitation #262 in Books >

## Customer Reviews

Allan Ropper, MD; Martin A. Samuels, MD, FAAN, MACP; and Joshua P. Klein, MD (Boston, MA) are affiliated with Harvard Medical School.

The standard of the profession, but Samuelson and Company are just too snooty about their "Bostoncentric" tilt. Very well presented and exhaustive. But there's nothing there that they discovered. Just an Excellent compilation.

Outstanding book. Have used the previous edition. Very clinically oriented approach.

Great book. Excellent seller.

I am reading this book with great pleasure. It is the best neurology reference, in my opinion.

Major, definitive text.

As advertised.... gud buy. Will recommend

Must have, a classic

great resource to have for neuropsychology
