Young children will love turning the pages of this delightful book as they explore the world of wild animals.

My 5 year old daughter has always loved touch and feel books. We only had a couple and she always would beg for me to read them over and over. I now have an 8 month old son who doesn't sit through books well. Well, my daughter pulled out some of her old touch and feels and he LOVED them. He sat through them, interacted with them, etc. So I decided to buy more for him. This one is nice. It's not too long, but it gives a good variety of textures for him to feel. Even the cover is touch and feel. He loves seeing and touching all of the baby animals in this book. Was very happy with the price as well, can't beat \$3.

This book is one of our favorites. I still hate the "grass". More texture would have been better. My 12 month old loves the small pages and it's our go to book for traveling. We always take it with us on plane and car rides to entertain her. We hide it before a trip so it's "interesting" once again on the trip.

Cute book, but not all of the animals have a soft touch and feel page. Smaller book than expected but easy for my little one to hold. Great for the price but would have been disappointed if I had paid any more.

I like the fact that this little book is not jam-packed with words and images on every single page. Many early books seem to be very "busy" - deal breaker for me. I was looking for a simple format with not too much going on in terms of visual information. This was it. I bought this book for our four month old (we've started early). Just wish the book had more of the touch and feel stuff on display. Also, the parts aren't very obvious on some of the creatures, not sure why. I also feel it could have used more animals. Cute book. Decent but.

Cute but the touch and feel is tiny amounts only on one side and repeated textures- get another book this one is cheap. The dinosaur one is much better quality

This doesn't have much variety with the textures. The pages/pictures are very simple so that can be good for little ones. There are probably better touch and feel books out there.

The books dimensions are about a 5" x 5". The pictures almost fill the page but I am really disappointed in the size of the "touch and feel" space cut out. They all are soo SMALL. I mean some are a little bigger than a quarter size. I would recommend trying to find one where the area is much

larger so your kids can actually "touch and feel". Not all images have an area to feel, some have a small glittery area. The book and pages are good material. Seems durable.

My 8 month old daughter loves these touch and feel books! She loves looking at the animals and feeling all of the textures. The only reason I give it 4 stars instead of 5 is because it's a book about wild animals, so you would assume that it has the textures of the actual animals. However, there are 3 pages that don't make sense to me, for instance, there is a picture of an elephant and calf but instead of having a texture of the elephant, it has some shiny grass that isn't really textures at all. But overall, my daughter loves this book and doesn't seem to mind!
