When our 8-year-old daughter found out we were going to move out of state, she asked for moving advice. I found this book and she devoured it. It told her what to expect before and after the move, and it had places for her to journal. It was just what she needed to help her through the biggest event in her life so far.

My daughter is 9 and we are relocating. This book was the perfect book for her. She loves it and is more comfortable with the changes our family is making. Thanks so much!!! Would recommend to any child faced with a move.

we're about to move from the only home my ten year old has known. so far, she has found this to be very helpful

This book would be very good for kids who are able to read and write independently and fluently - perhaps 8 and up. If you have a lot of time on your hands, you could use it with kids as young as 5 but you'll have to read and write in it for them.

I found The Moving Book to be straightforward, well organized, comprehensive and very informative. As a gift, I've already given 2 copies of the book to my children's playmates. They are quickly filling up the pages with past life experiences, present anxieties and plans for the future. This living map is precisely the guide and transitional tool essential for any move. This book should be required for any pre-school or grade school student who is about to move. I can only hope that if or when the adult version comes out I'll be the first in line.

My family just experienced a difficult cross-country move. My two boys (ages 7 and 9) each had their own copy of this book (going away gifts from a neighbor) and each really made it his own. I think it played a large part in helping them cope with our move, helping them to understand what was going on and what to expect. I highly recommend it.

This book was just what my son needed. We just found out we're moving to Brussels and he needed some words to express how he was feeling about it. We sat down and literally read one or two pages and he said, "Mom, that's just how I'm feeling." That was the entire reason I bought this book.

My 8-year-old daughter received this book as a gift when we moved cross-country. She was very nervous about the move, but this book helped her tremendously. It helped make moving an adventure. I have since recommended this book to other parents. It is well written and full of helpful advice.
