## Customer Reviews

Gr 6 Up-Two timely treatments of topics relating to teenagers' obsession with body image and weight. *Eating Disorder Survivors* includes narrative accounts from four teenagers who overcame compulsive eating, anorexia, and bulimia. Each one relates his or her experience with developing an eating disorder and recounts the steps taken to achieve recovery. All of them stress the importance of seeking professional help. The stories are detailed enough to be interesting but none are sensationalized. The emphasis is on the hope of recovery. *Weight-Loss Programs* discusses the relationship between health and diet and examines a variety of commercial weight-loss programs and the health risks that they pose. The hidden costs, emotional pressure, and influence of persuasive advertising are addressed, as is basic information on why diets don't work. Tips on "rebellious against the diet culture" are included, along with suggestions for having a healthy lifestyle. Both books are clearly written and illustrated with full-color photographs of ordinary-looking teen models. Both take a positive approach to a potentially dangerous subject. Those needing additional titles in these areas might look at Steven Levenkron's *The Best Little Girl in the World* (Warner, 1989) or Chelsea Smith's *Diary of an Eating Disorder* (Taylor, 1998) for more fully developed

narrative accounts.-Joyce Adams Burner, Hillcrest Library, Prairie Village, KS Copyright 1999  
Cahners Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

I enjoyed the book as it revolved around the mind working to cope with stressors. Anorexia, a maladaptive coping mechanism, does not claim its victim. The triumph was visible as well as the hard work involved in full recovery. The book let the reader see that recovery is a long path that does not include just the eating disorder. It provided the hope that life goes on with the ED, but it takes on other aspects and becomes fuller.
