The Covert Colonization Of Our Solar System

Synopsis

In the "Covert Colonization of Our Solar System" is revealed how the military Industrial Complex of the U.S. was taken over by the same Nazis brought in after World War II in "Operation Paperclip". This takeover, among other things, resulted in a large scale "Black Project" colonization of our solar system, using antigravity technology developed by the Germans before and during World War II and developed further with help from extraterrestrials which the Germans had formed alliances with. The scientific principles of how this antigravity and free energy technology works is also discussed. Full disclosure of all this is scheduled to happen in the near future.

This book has completely changed my worldview and my career path. I refuse to work for corporations who are actively dumbing us down, poisoning us, and wish to annihilate most of us. Read this book, I implore you! You won't regret it at all. There are a lot of fakes and deception about occulted subjects, but something tells me this author is the truth.

Invaluable information. Well written. Compact format. Glad that I bought it.

great book great read fills in a lot of the gaps from me a must read for all

I found the information laid out well in a timely unfolding of the process of incorporating our solar system. Our present history belief systems are controlled cover stories. This book assists those who

look for full disclosure .

Keep a open mind when you read this book because it will expose you to the truth that many think is impossible. This book ties in with other books I have read and even gave me a better understanding.

It is an interesting subject, however, there are typos, repetitions, and some concepts are only touched too briefly upon.

A good summary of evidence which the author has apparently collected over many years. Like many ebooks this one is spoiled by poor attention to spelling, punctuation and formatting.

Haven't read all of it yet , but a very interesting read if you have an open mind.
